

*The voice and will of the 99%.*

*One nation for all mankind, living in peace, equity and justice, respectful of differences, united in purpose and treating nature as a sacred garden.*

National governments and international organizations have gone astray and are treating people as commodities to be used and abused, as one time voters to be deceived and lied to, and as potential enemies to be spied on, censored, controlled and punished. The society the New World Order has created is militaristic, unstable, punitive and oppressive and serves only the interests of the elites who are impoverishing and disenfranchising the masses in order to advance a global government that is undemocratic and unfair. The system the global elites have created is collapsing because it is both morally and fiscally bankrupt, a state it has arrived at by virtue of its monopolistic, undemocratic and predatory nature. We, the people, must take control of our destinies and this can only happen if we make the economic and political decisions by which we are to live. Our elites have failed and have lost our trust and therefore the right to govern. It is now our turn and we can only prevail if we organize across borders as an international political force united in purpose, devoid of prejudices and free of false loyalties.

# CORE PRINCIPLES

## ECONOMY

*An economy of inclusion not exclusion.*

### PRINCIPLE 1

#### PROPORTIONAL INCOME AND EQUAL TAXATION

The income gap will be addressed through universal rules and firm legislation that tie the highest earner to the lowest in every industry and between every industry, be it private or public, at a ratio of 1 to 10 and through proportional wage increases and profit sharing programs across the board and equal taxation limited at 25% of income. **No more CEOs or bankers who earn 600 times an employee's salary. Exorbitant profits at the top will be replaced with prosperity for all by legislating that the highest earners cannot bring in more than 10 times what the lowest earners bring in.**

### PRINCIPLE 2

#### STRATEGIC DEVELOPMENT BY HUMAN NEED

Investment and strategic development decisions will be made by human need and supported by science and foresight and will no longer be made by bankers and the stock market and their special interest groups. **Need not greed will henceforth inform economic policy. Self-serving regulations that have led to the corruption of the system and a depraved collusion between big business and politics will be replaced with rational and fair regulations that benefit society at large.**

### PRINCIPLE 3

#### INDUSTRIAL COOPERATION NOT PREDATORY COMPETITION

Sustainable development and collaborative and cooperative industrial and agricultural activity will replace the destructive development and predatory and competitive practices of today. Corporate entities too big to fail will be broken up or dissolved and industrial production will be duplicated from region to region to be run independently and locally, free of monopolies and in the spirit of cooperation and sharing and not with the goal of destroying the competition and increasing market share. **No more too big to fail and no more predatory practices that drive employment conditions and wages down by pitting workers in the developing world against workers in the developed world and make life unbearable for the working man and employment unstable.**

## PRINCIPLE 4

### WORK AS A RIGHT NOT A PRIVILEGE

Employment in today's fully monetized economies must be enshrined as a right and not seen as a privilege. Everyone must and will be working. If the private sector cannot provide employment the public sector will through infrastructure development, food production and home construction on a massive scale to prevent poverty and desperation and to empower people to be in control of their lives and destinies by giving them the tools necessary to fill in the gaps left open by the free market. **Work is a right not a privilege and universal wellbeing depends on society's ability to include each and every one in the creation of wealth in a free market that is not free to abuse and exploit.**

## PRINCIPLE 5

### HAND AND HEAD WORK FOR ALL

The division of labour between manual and intellectual work leads again and again to social division and ultimately to class war. The new socio-economic system must henceforth not only enable but demand from each and every individual the opportunity for both types of labour, manual and intellectual, according to the individual's skills and abilities. This will eradicate disdain for manual labour, the monopolization of professions, unfair income gaps between manual and intellectual labour, and the tyranny of technocrats, bureaucrats and intellectuals over the working man. It will naturally lead to a fair economy and a respectful society. It will also ensure a healthier life by alternating sedentary intellectual work with active manual work within the work week of every man and woman. **Everyone must work with their hands and with their heads and society must be redesigned to provide opportunities for dual employment.**

## POLITICS

### **Global democracy not autocracy**

## PRINCIPLE 6

### GOVERNMENT OF THE PEOPLE, BY THE PEOPLE AND FOR THE PEOPLE

Politics is too important to be left to politicians. Direct democracy through referenda for the most important decisions and truly representative democracy for daily governance are the answers to today's state dysfunction and self-serving political class. The political class will be replaced by rotating representatives of the populace elected locally every two years to represent a cross-section of society for one and only one term of office in life. **This will free democracies of the tyranny of lawyers and will ensure that government is composed of members of all professions and income groups. It will also prevent the monopolization of political power by the established elite and their manipulation by interest groups.**

## PRINCIPLE 7 NEITHER GREED NOR ARTIFICIAL EQUITY

No bill shall pass into law that compromises the highest standards of international law, violate the individual's dignity, or alter the division of wealth and labour advocated by OM. **Never again will humanity allow capitalist greed and class-interest to divide us by giving rise to immoral and destructive inequities. Nor will we ever again allow communism's artificial division of wealth through misguided methods of redistribution to destroy private initiative and entrepreneurship.**

## PRINCIPLE 8 NO INSTRUMENTS OF WAR

Every nation that chooses to be governed according to the principles of OM will immediately dissolve its standing armed forces and shift their resources and manpower to existing and newly created civilian institutions tasked with assisting the implementation of the massive work- and wealth-creation programmes necessary to ensure universal prosperity and economic stability. **Never again will the military-industrial establishment and the mentality of war waste earth's precious resources and disrupt peace on earth by pitting nation against nation.**

## PRINCIPLE 9 OPEN BORDERS

Every nation that chooses to be governed according to the principles of OM will immediately open its borders to allow the unrestricted movement and resettlement of people regardless of their origin as well as unrestricted trade with nations that reciprocate in full the practice of free and fair trade. **Never again will capital enslave labour by taking advantage of national or regional differences to exploit the working man and to shackle him in economic bondage.**

## PRINCIPLE 10 INTERNATIONAL ORGANIZATIONS UNDER DEMOCRATIC CONTROL

The United Nations will be reformed by dissolving the Security Council and by ensuring that each member of the General Assembly is voted into office by general elections at the regional level and that he/she has no affiliation whatsoever to the ruling party and no contact with the national authorities for as long as he/she serves in office. **The role of the people-elected UN General Assembly will be that of a global government limited to working towards a one nation world by coordinating a plan for global unity that adheres strictly to the highest standards of international law, but that allows enclaves of stubborn regional and cultural differences to live by their norms and values as long as they are limited to clearly delineated geographic areas and do not impose their rules on global citizens who pass through or choose to or have to reside in their areas of control.**

## SOCIETY

*A humane and just society where every individual is respected and nature protected*

### PRINCIPLE 11

#### GLOBAL CONSCIOUSNESS, GLOBAL CITIZENSHIP

Nations are obsolete and stand in the way of developing a global consciousness and of working together to solve new and old problems. When capitalism's economic cycles arrive at recession or depression politicians blame outsiders, leading to conflict between nations, and prejudice displaces reason within the population, leaving the weak, the foreign and the disenfranchised vulnerable to abuse. Open borders not detention camps, healing centres not prisons, brotherhood not animosity, peace corps not armies is what we all want but fail to find because we are trapped in nationalism. *Only by thinking of the world as our home and of every human being on earth as our cousin will we succeed in finding peace, serving justice and bringing prosperity to all. Our actions must reflect our ability to think globally, for only then will we give ourselves the freedom to be global citizens and the benefits of a global economy.*

### PRINCIPLE 12

#### CIVILIZATION WITHIN NATURE

The natural balance has been destroyed by human civilization and needs to be restored at all costs because the future of mankind depends on it. Technological innovation, energy savings, individual and corporate reductions in the carbon footprint, and emissions trading will not bring down greenhouse gas concentrations in the atmosphere at a level necessary to prevent let alone reverse climate change. Nor will any of these measures free the space now occupied by industrial and agricultural activity back to nature so that ecosystems can regenerate and corridors of life can be created that are large enough to allow nature to take its course. Only by reducing our numbers will we be able to restore the natural balance and to ensure that human civilization continues to evolve within nature's limits. *To reach equilibrium between civilization and nature our numbers will have to decrease by half and this can only occur if the next three generations adopt a one child policy. Without the will and the wisdom to reduce our numbers humanity will self-destruct.*

### PRINCIPLE 13

#### INDIVIDUAL DIGNITY

The individual is more important than institutions. Institutions that demand from individuals that they surrender their own judgements and consciences to safeguard their place within a bureaucracy and the bureaucracy itself do not deserve to exist and have to be replaced by new institutions. Our current system is partly failing us because it is sustained by bureaucracies that kill individual dignity and take away man's ability to make value judgements that are subtle and humane. *The social, economic and political package envisioned by the 99% puts man at the centre of civilization and compassion at the forefront of society, giving hope and dignity to all.*

## PRINCIPLE 14 THE GOLDEN RULE

The wisdom of the ages, to treat others the way we want to be treated ourselves, must be inculcated in our psyche through education and once again allowed to flourish by a socio-economic organization and by political and legal structures that do not force the individual to act contrary to the Golden Rule. The current capitalist economy and class-structured societies are antithetical to the Golden Rule and allow individuals only to pay lip service to it. **Without the ethical guidance of the Golden Rule mankind will not advance to the higher level of consciousness we need to think of one another as family, to work for each other as brothers, to treat nature as our mother, and to share and to love one another without expectations of advantage or ulterior motives.**

## PRINCIPLE 15 ONE MAN ONE GOD

No one man and no religion knows the will or nature of God. The spiritual domain and the divine that inhabits it must be freed from the arrogance of organized religion and surrendered to the individual and our innate spirituality so that we may all seek and find our own God. Spirituality thus freed will strip away the dogmas and hierarchies of organized religion and consign them to the past so that they will be looked upon as traditions we have outgrown and respected as historic necessities that helped us find unity and decency at the heart of the elemental universal consciousness that inhabits us and that we inhabit. **Organized religions must cede ground to individual spirituality if human beings are to live in the image of God.**
